

# Chapter 9: Paracosmoetics

Download the Adobe Reader (PDF) document for Chapter 9.

## 9.1 Definition

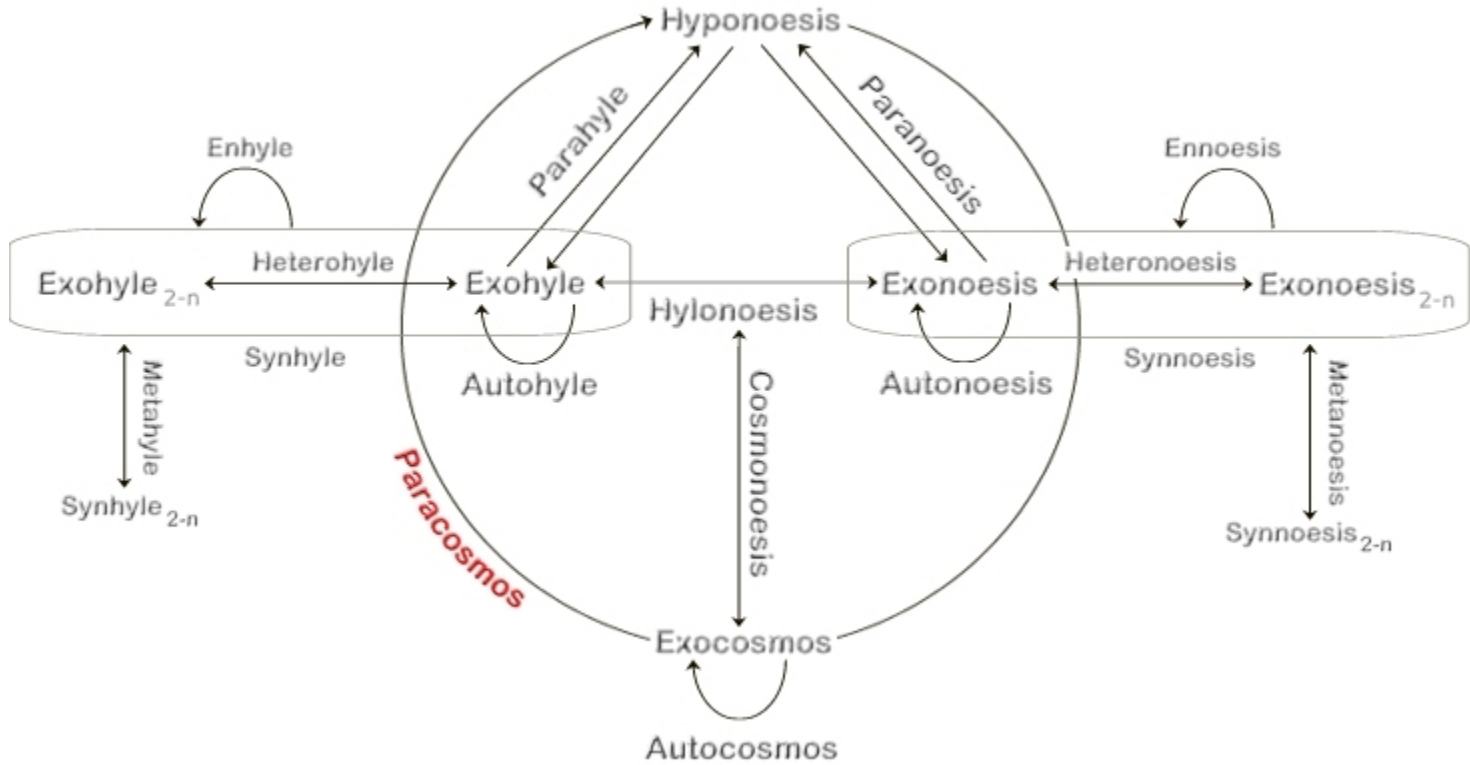

Figure 1 - Paracosmos

From Greek *παρά* (para = past, beyond) and *κόσμος* (kosmos = order, universe, world, totality). As opposed to the world as it appears to our senses (*Exocosmos*), the *Paracosmos* represents the higher-order, mathematical model of the world consisting of energy fields and probabilities rather than concrete empirical objects.
